

SWSTREAM USER TIPS

How Does it Work?

Southwest Stream is an Internet based streaming TV service that provides a full cable TV experience through an approved streaming device such as a standard ROKU™ or Android™, or a compatible Web Browser. You can watch all your favorite channels, including local broadcasts, on the same device you already stream Netflix™, Amazon™, Hulu™ and other favorite app content.

I have multiple ROKU's, how will that work?

Every Southwest Stream subscriber can connect up to 5 “Anywhere” devices simultaneously.

What about devices other than ROKU™?

At this time, Southwest Stream supports ROKU™, Android™ or viewing on your computer using a web browser for “Anywhere”. On a Mac running Safari or Chrome, you can Airplay to Apple TV. Here is a current listing of devices that are compatible with Southwest Stream.

How do I Record (DVR Feature) on Southwest Stream?

1. Go to your **MENU** options in Southwest Stream. You will know you are there when your screen becomes a split screen with menu listings on the left and on the right you will see the current channel you're watching.
2. Go down to **GUIDE** and select.
3. Find the show you would like to record and highlight over it. You can find future shows that are to air by continuing to click to the right of the screen.
4. Now press your * key on your remote.
5. You will now see three ways to record.
 - a. **Record Series** – This will record every episode both **new AND old** as it is scheduled.
 - b. **Record First Run** – This will record the **NEWEST** episode as it is scheduled.
 - c. **Record** – This will only record the episode you are highlighted over **ONCE**.

How do I play Recordings on Southwest Stream?

1. Go to your **MENU** options in Southwest Stream. You will know you are there when your screen becomes a split screen with menu listings on the left and on the right you will see the current channel you're watching.
2. Go down to **RECORDINGS** and select.
3. Select your show you would like to watch that has been recorded.

How do I see what is playing next or in the future?

1. Go to your **MENU** options in Southwest Stream. You will know you are there when your screen becomes a split screen with menu listings on the left and on the right you will see the current channel you're watching.
2. Go down to **GUIDE** and select.
3. You can find future shows that are to air by continuing to click to the right of the screen. Your air time will display on the top of the guide.

Quick Tip: You can toggle through your guide quicker by using the rewind and fast forward buttons on your Roku Remote. This will can through channels 6 at a time. Also you can download the Roku app on a smart device and use it as a remote as well. Best for when entering information in with their keyboard feature!

How do I connect to my network settings?

SWSTREAM USER TIPS

If a connection to your home network and the internet was not established during Guided Setup or your network has changed and you need to modify the connection, access the Settings menu on your Roku device using the instructions below:

1. Press the **HOME** button  on your Roku remote.
2. Scroll up or down and select **SETTINGS**.
3. Select **NETWORK**.
4. Select **SET UP CONNECTION**.
5. Select **WIRED** (using Ethernet cable) or **WIRELESS** (using WiFi).
 - **Note:** The Wired option will not appear on Roku devices without an Ethernet port, except, when a compatible third-party USB to Fast Ethernet adapter is connected to a Roku Streambar™.

If you select **Wired**, your Roku device will connect to your network and the internet. If you select **Wireless**, continue to the next step.

6. Choose your wireless network from the list of available networks. If you do not see your network, select **Scan again to see all networks**. After you select your network, enter the password.

If you have any other questions on about SWStream and what it can do for you, give Chelsy a call at the office (507-847-1001) and she can give you some tips and tricks on how to customize it for your home!
