Internet speeds really comes down to what you are looking to use your internet connection for. These are suggestions.	Perfect package for e-mail, website browsing and Facebook.	Stream video content and music. Recommend for multiple device households.	4K video streaming, home security, smart appliances, large file transfers	Running a home office, using creative apps or software, fast file download of large files and online gamers.	Running home office, perfect for hardcore online gamers, using smart home devices, multiuser/multi-device functions.

Higher speed packages are available on request for businesses.

Managed WIFI will exist, but the fee is not yet determined. This saves you the hassle of buying a router and allows us to do trouble shooting with you over the phone, saving you a service call fee.

Fiber installation

1. Our contractor will plow or drill the fiber line to your property. This means very little yard disturbance.
2. A pedestal will be installed that will serve several homes. View a preliminary map on our website for possible pedestal locations and fiber routes. Draw your home/property, along with other underground services below. Label too.
3. This 9" x 12" gray box (Network Interface Device or NID) would be installed on the side of your house. *(Items #1-3 are all covered under the grant and add value to your property even if you do not sign up for a fiber monthly service package.)*

Draw your home/property, along with other underground services, as listed on the front. Label too. Street address: _____, Ceylon.
